

## Exercise 6

---

Please prepare a written documentation for each task before each exercise date. Failure to do so may jeopardise your admission to the final exam. Please note your name and student number on the documentation. You may be asked to present your solution in class.

1. Rewrite your code from Exercise 5 so that it supports multiple strategies for website comparison.
  1. Identical content size
  2. Identical html content
  3. Identical text content
2. Please draw a UML diagram to illustrate the pattern.
3. Describe the coding conventions you were using for your software.
4. Commit your software to the existing [github.com](https://github.com) project.
